

Code Finder

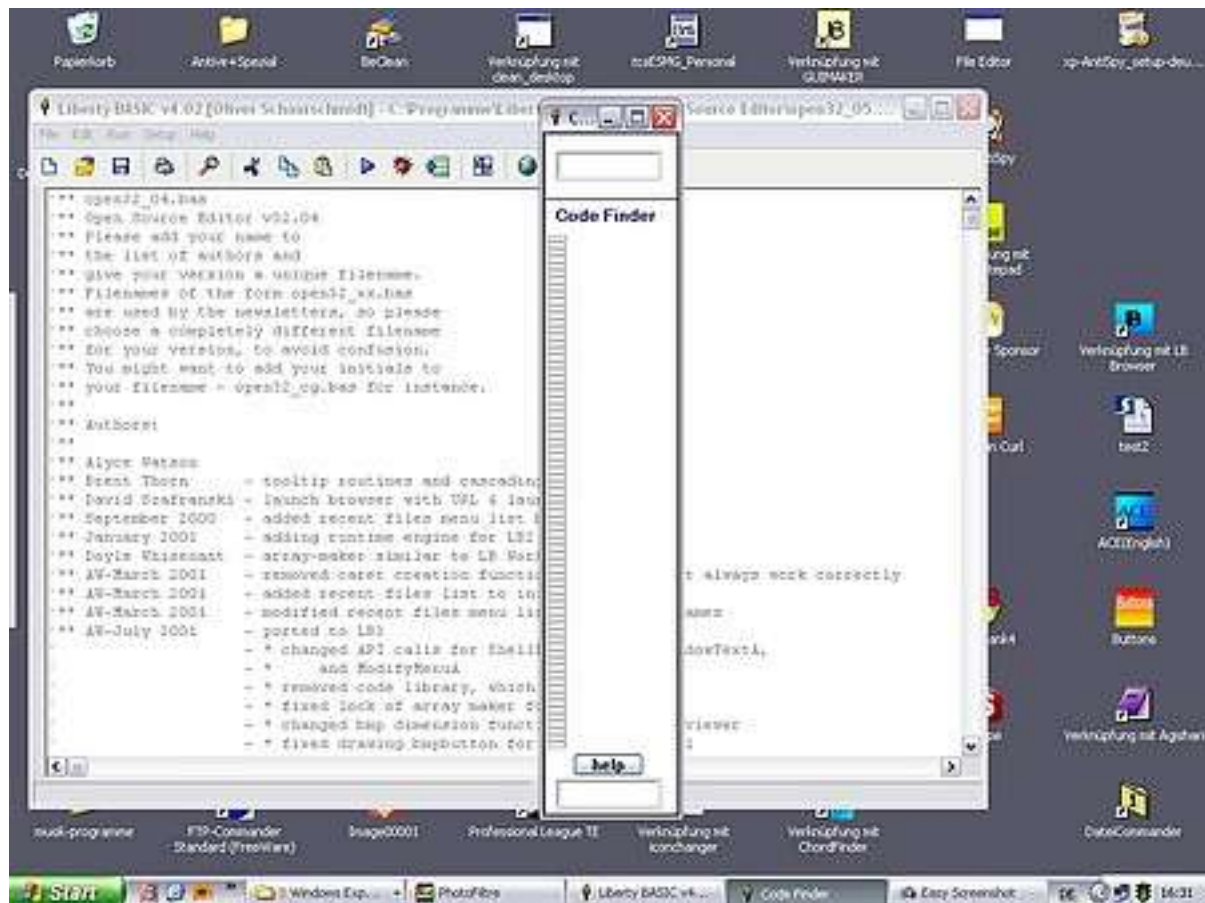

what is to do...

Code Finder is a tool to find the lines in the Editor. If you roll the Scrollbar to a place you can do with Code Finder one click select the place of the Scrollbar and next time you find the place again. In a project with 1500 or 2000 Lines it is hard to find a special Selection that you need for another project.

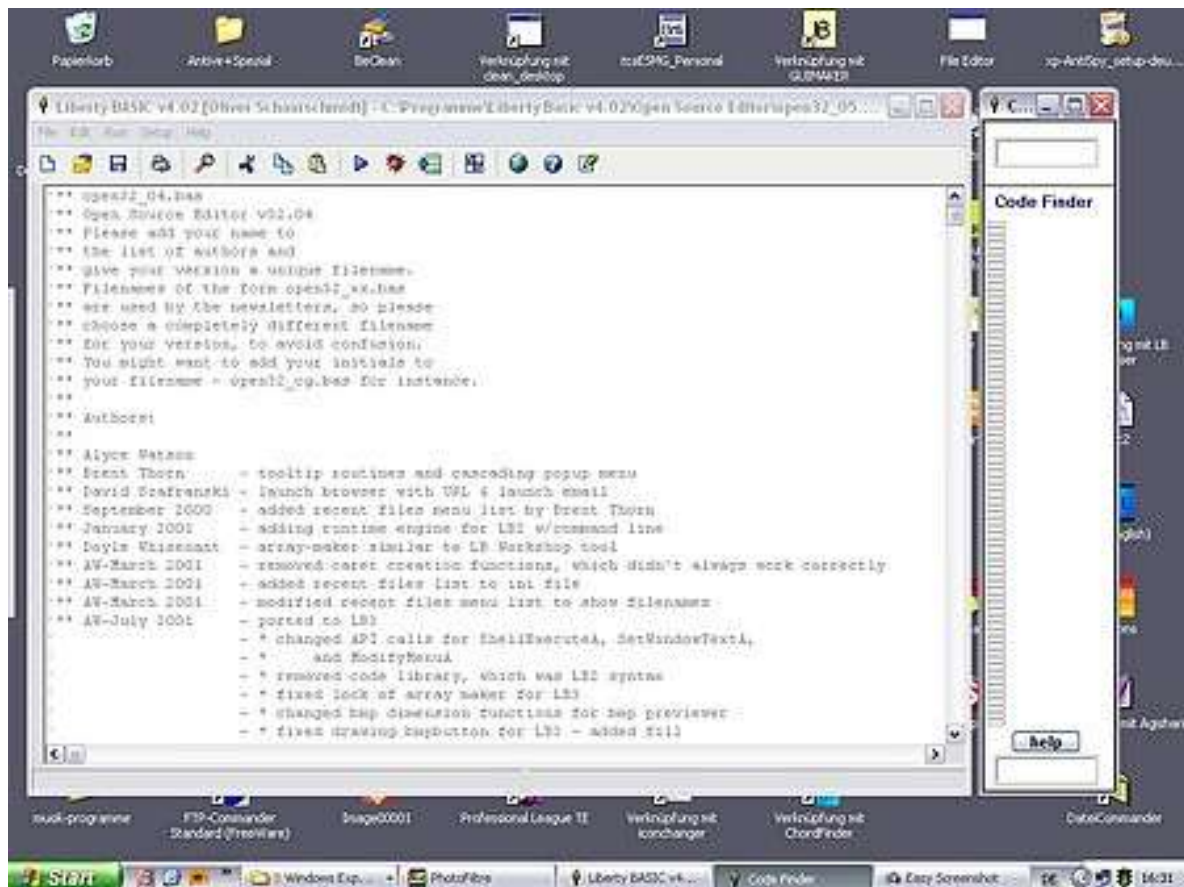

Installation on Editor in the Setup-External Programs.

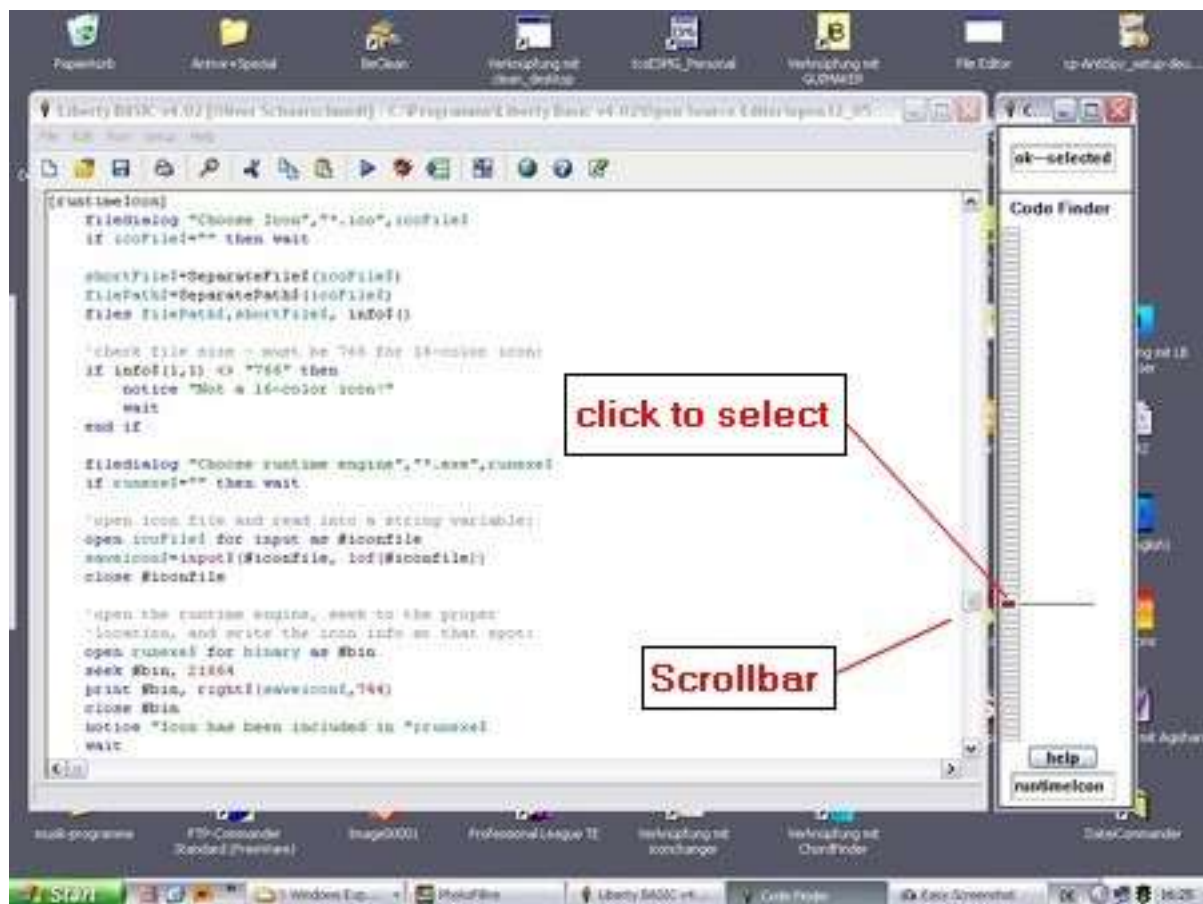

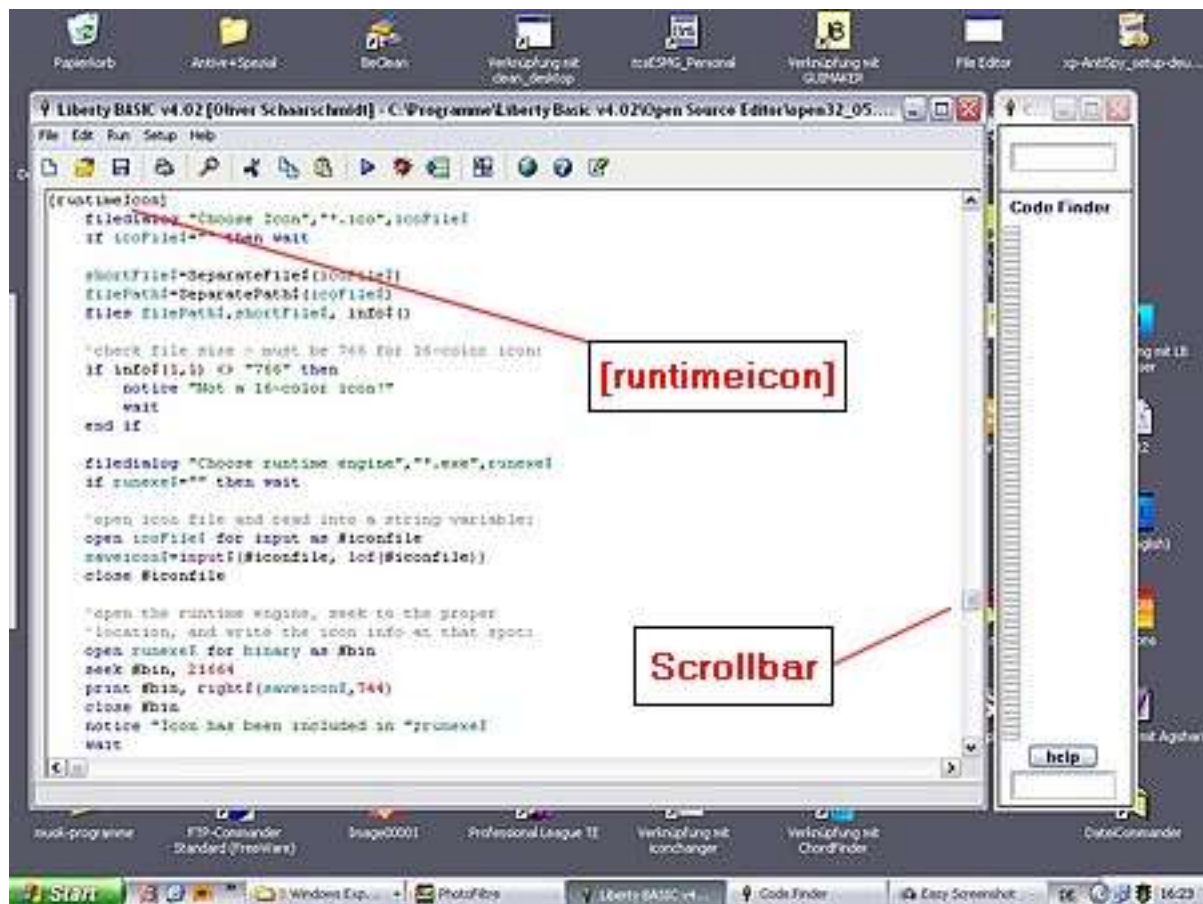

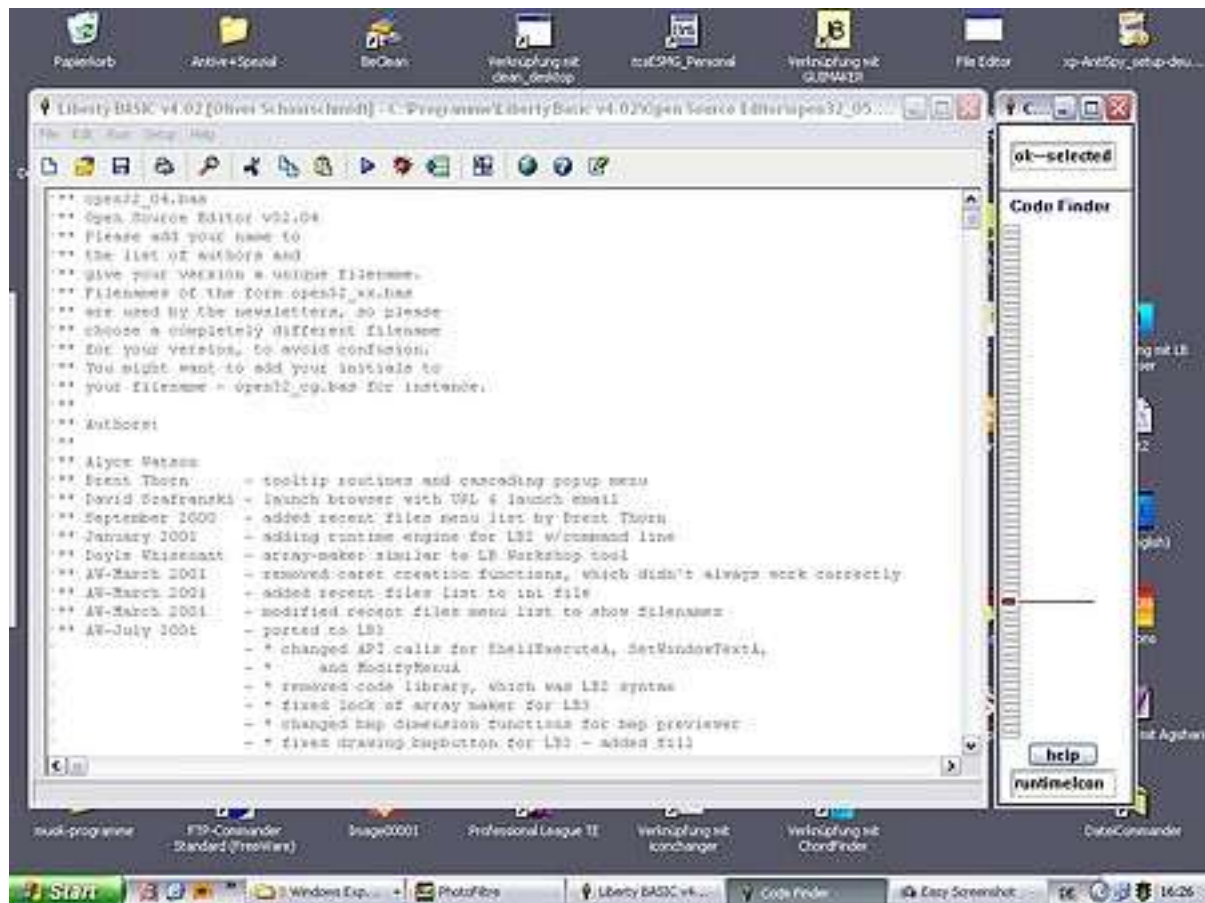

Now put the Code Finder in the same place height how the Editor.

What is to do!

Next if you search go to the select field with the Scrollbar...you'll find the position that you need in the Editor.
